*Project Look Sharp: Integrating Media Literacy and Critical  
Thinking into the Curriculum*

**Instructor:** Chris Sperry, Project Look Sharp, Ithaca College  
**Date:** July 22, 2010  
**Time:** 9:00 A.M. - 3:00 P.M.  
**Location:** Oneida Conference Room - BOCES at Middle Settlement Rd., New Hartford

**Description:** According to the Kaiser Family Foundation, media exposure (not school related) for 8-18 year olds reached an astounding average of 10 hours and 45 minutes a day in 2009. This saturation necessitates new approaches to literacy that trains our students to be critical thinkers and reflective users of multiple forms of media.

Award winning teacher and author, Chris Sperry, has pioneered approaches for integrating media decoding into the core curriculum. This interactive workshop will begin with an exploration of new media and youth culture in the 21st century. Chris will introduce the basic concepts and frameworks for media literacy education and present interactive classroom models and materials that teach core skills and knowledge. These models will be chosen for this audience and linked to New York State standards and assessments. If you have questions please call Theresa at 793-8514.

## Podcasts & Jings

**Instructor:** Pat Skelly & Kim Casselman  
**Date:** July 29, 2010 - **CLASS FULL**  
**Date:** August 13, 2010 - **2nd CLASS Added**  
**Time:** 9:00 A.M. - 3:00 P.M.  
**Location:** BOCES IT Lab

**Description:** Participants will create lessons or directions for activities using these applications. Podcasts are recordings of your lessons, directions, explanations, etc. for students to download to MP3 players and computers. Jing is a video recording of computer application with a voice over explanation. For instance, you want to demonstrate how to search for a book in your catalog: you work through the steps on the computer talking as you go and Jing records. Participants should bring lesson content that they wish to use in their recordings: they can access web-based programs from the BOCES training lab, but check with us prior to class regarding specific software programs you use in your classroom. Teach students to create their own Podcasts and Jing videos for classroom assignments. We will be working on PCs not Macs.
