Green Technologies/Global Warming/Renewable Energies

We have purchased several new titles for our technologies/science collection in the past year to keep our collection current. These are also great discussion starters for Language Arts and Social Issue classes and Public Policy units in American Government. The majority of the titles come from Hawkhill Science, recommended by AAAS Science Books & Films and the Video Project, CINE Golden Eagle award winners. We are also open to suggestions for titles from teachers that would help build this collection.

In the Spotlight

DVD771 An Inconvenient Truth: A Global Warning 96 min/JS
Former Vice President Al Gore presents an eye-opening and compelling view of the future of our planet - and our civilization - in the MUST-SEE documentary of the year. This is a wake-up call that cuts through myths and misconceptions to deliver the message that global warming is a real and present danger. An Inconvenient Truth brings home Gore's persuasive argument that we must act now to save the earth. Each and every one of us can make changes in the way in which we live our lives and **BECOME PART OF THE SOLUTION.**

Every teacher in our database has access to digital media and digital sound recordings through their Web/MAX account. Just

click on DM and/or DS and hit "go" and you will see several thousand titles at your finger tips. EdVideo Online from public television (WCNY Syracuse) is loaded in our online catalog. You only need to log into Web/MAX - one log-in one password to access all the resources available to you through BOCES Media Technology Services. We will also facilitate training in your school district. Please contact Sylvia, 793-8513, ssallustio@oneida-boces.org, if you want to schedule training or have any questions.
