Name _____

Date _____

Toy Cars (answer key)

steel car
left

plastic car
right

1. In the picture above, what is the car on the right made of?

The car on the right is made of plastic.

2. Which car would be attracted to a magnet?

The car on the left will be attracted to a magnet.

3. Explain below why one toy car is attracted to the magnet and the other is not?

One toy car is made of steel and it has iron in it so it is attracted to the

magnet. The plastic car has no iron in it so it is not attracted.
