

SKILLS USA

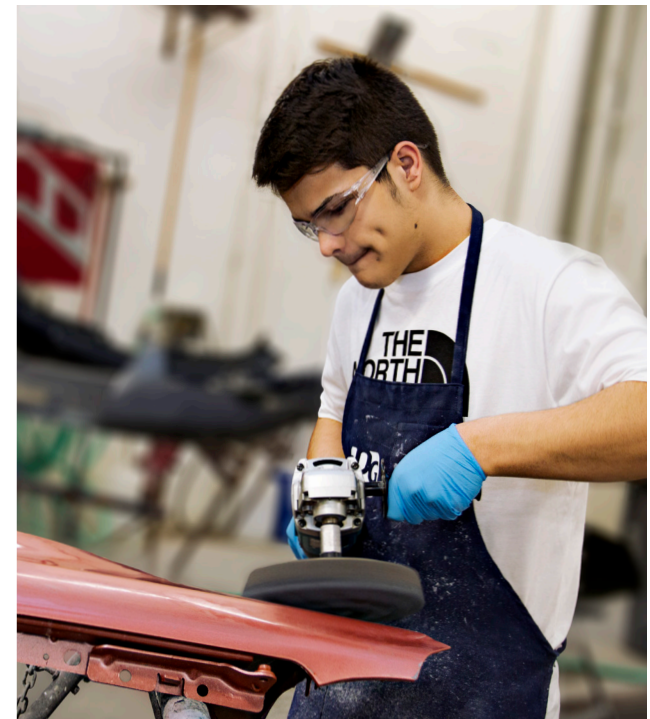

Skills USA offers leadership and citizenship development to complement the CTE students' skill training. Members may also participate in local, state and national Skills USA competitions.

FFA CONSERVATION CLUB

The National FFA organization is the oldest vocational organization in the United States and is recognized by the federal government as an important part of vocational education. FFA promotes leadership development through activities that benefit students and the community. Students gain valuable leadership experience toward success in the work force. Membership is open to any CTE student.

HONOR SOCIETY

Each May, outstanding students are inducted into the Career and Technical Honor Society. They are students who have shown excellent academic achievement, good attendance, active participation in organizations, and a serious interest in their field.

“REPORTED DATA SHOWS 98% OF OUR CTE SENIORS GRADUATE HIGH SCHOOL AND MORE THAN 75% ATTEND POST-SECONDARY INSTITUTIONS”

SCHOLARSHIPS

Each spring, our program awards approximately \$20,000 in scholarships and awards to seniors. These awards and scholarships generally go to those students exemplifying all or some of the following qualities:

- Good academic standing
- Positive attitude
- Excellent attendance
- Good citizenship/community service
- Work potential – both in and out of the classroom

INTERNSHIPS

During school hours, a student may be assigned to observe and participate in a variety of activities related to his/her curriculum at an off-campus site.

Students in the New Visions program spend four days a week at workplace internships in business management, communications, education, engineering technology, health, legal, nanotechnology, performing arts or veterinary science. One day each week is spent in the classroom working on related curriculum projects, listening to guest speakers, or taking virtual field trips.

COLLEGE CREDIT INTEGRATION

New Visions programs offer three college credits from MVCC for English 101. This is at no cost to students. Seniors in Conservation can pay a reduced fee and be eligible to receive three college credits from SUNY Morrisville in their Environmental Science (ENSC 100) course. Also, students in traditional programs may have the opportunity to obtain six college credits in their junior year and an additional six credits in their senior year by participating in pull-out dual credit courses including: Computers in Society, Introduction to Business, Personal Finance and Principles of Marketing.

ARTICULATION

Through articulation agreements between post-secondary institutions and the Oneida-Herkimer-Madison BOCES, students may gain advanced standing in certain programs, and for others, actual credit for a college-level course.
